

PROJECT WORK
FORMATIVE TEST –4
VIII- CLASS
FEBRUARY -2024

ఇది కేవలం నమూనాగా మాత్రమే తయారు చేయడం జరిగింది. ప్రాజెక్ట్ ఇలాగే తయారు చేయవలసిన అవసరం లేదు. మీ స్థానిక అవసరాల దృష్ట్యా మార్పు చేసుకోగలరు. ఈ ప్రాజెక్ట్ ఆంగ్ల మాధ్యమం విద్యార్థులను దృష్టిలో పెట్టుకుని చేసింది.

TITLE OF THE PROJECT

PORTO ALEGRE CITY

INTRODUCTION

The grandeur of the town of Porto Alegre will be introduced

AIM OF THE PROJECT

We have chosen this project with the intention of fully understanding the History of Porto Alegre.

COLLECTION OF INFORMATION

We have collected this information from our social text book, news papers , And the internet .

RECORDING OF INFORMATION

What is Porto Alegre best known for?

As the second largest city in southern Brazil, it is an important industrial center in the area. It is also a center for history and culture, famous for its barbecue and a strong and hot tea prepared from erva mate.

Sewer service is available to 87.7 percent of the city, and 100 percent of the population is serviced by treated water. While in most Brazilian cities the water is supplied by large state companies, in Porto Alegre the Municipal Department of Water and Sanitation Services, (DMAE) is the provider.

It is the largest municipal water supplier in the country and enjoys operational autonomy and financial independence. As a separate entity from the municipal government it can make its own decisions on how to invest revenues it has collected, and such decisions are not directly subject to interference from the municipality.

It receives no subsidies and makes no payments to the municipality itself. As a municipal undertaking, DMAE enjoys tax-exempt status, which allows it to keep water prices lower....

The program will be carried out by the Municipal Department of Management and Strategic Support and will focus on improving water quality in Guaíba Lake and the Cavalhada River, developing urban infrastructure to reduce flood risk along the Cavalhada River, improving the environmental management in the Municipality of Porto Alegre, and promoting efficient municipal water, sanitation and storm drainage services.

This program will improve the quality of life of the population of Porto Alegre by restoring water quality along the west side of Lake Guaíba and directly benefitting more than 700,000 residents through expanded public sanitation services and urban environmental improvement.

CONCLUSION

We are very much thankful to our social studies teacher and also the Headmaster of our school for their cooperation and guidance throughout the project work .
