TITLE OF THE PROJECT

LAMMASINGI

INTRODUCTION

About Lambasingi which is known as Andhra Kashmir and its climatic conditions will be introduced

AIM OF THE PROJECT

We have chosen this project with the intention of fully understanding about Lambasingi .

COLLECTION OF INFORMATION

We have collected this information from our social text book, news papers, And the internet .

Lambasingi (or Lammasingi) is a small village in the Eastern Ghats of Chintapalli Mandal of Alluri Sitharama Raju district in the Indian state of Andhra Pradesh. With an altitude that of 1000 m above sea level, the area is cooler than the surrounding plains and is covered in moist deciduous forest cover. There are several coffee, pine, and eucalyptus plantations around the area and some small attempts to grow apple and strawberry.

The region was formerly densely covered in forests and known in the past to have supported tigers. The large wildlife in the region includes gaur. The region is known for its diversity of bird life which were studied by numerous ornithologists including Trevor Price, Dillon Ripley, Bruce Beehler, and K. S. R. Krishna Raju.

The village is located around 107 kilometres away from the Visakhapatnam airport and is not too far a destination if you plan to drive down. The hairpin curves and the view of the misty mountains make the drive enjoyable. If you plan to use public transport, both buses and taxis can be availed to reach Lambasingi from Vizag. While Lambasingi offers tourists few resorts and hotels that have recently sprung up in the hill station, if you can befriend a resident in the region, you could find homestays. Of late, groups have also started offering tourists tents to spend the night. For anything between Rs 1,500 and Rs 2,500, you can strike a deal for a tent, food and also an early morning, guided trek. Some packages also include a visit to a strawberry farm, where you could go strawberry picking.

Lambasingi Snow: Experience Kashmir in Andhra Pradesh:

With quaint valleys and chilling temperatures, Lambasingi is the only place in the southern region that sees snowfall. Perched at an altitude of 1000 meters above sea level, this misty hill station in Visakhapatnam's Chintapalli town, is also fondly known as the 'Kashmir of Andhra Pradesh'. Another name for Lambasingi snow is *Korra Bayalu*, which in translation means “if someone stays out in the open at night, by morning they would freeze like a stick!”

CONCLUSION

We are very much thankful to our social studies teacher and also the Headmaster of our school for their cooperation and guidance Throughout the project work .
